

## 04.06 Double majors

### Description

#### 04.06 Double majors

Students may enroll in any combination of majors with the approval of the appropriate departments and the Office of Academic Affairs. Students must meet all requirements for each major in order to complete their Bachelor of Music degree. Certain combinations of majors may require additional semesters of study, given sequencing and credit load considerations.

Students interested in adding a new major must meet with the chair of the department and pass all admission requirements as established by the department, including performance assessments and academic file review. If accepted into the second major, the student will need to complete a “Change of Academic Status” form (available in the Office of Academic Affairs) and submit it to the Dean of Academic Affairs for final approval. Approval of a student’s double major program is given by the Dean only on the recommendation of the chairs of the major departments.
